The EPD-Net Project (Filling The Gap: Development of Ecological Planning and Design Learning Network and an Adaptive Smart Training Module for Disaster Resilient and Sustainable Cities) is an EU co-funded Erasmus+ initiative bringing together 32 partners from 13 countries.
It focuses on ecological planning and design (EPD) for disaster- resilient and sustainable cities by establishing a transnational learning network and developing an AI-supported, adaptive “smart training module” (LMS plus a self-assessment component). The project aims to strengthen the role of planning and design disciplines in disaster management and to enhance employability and institutional capacity through training content that integrates green, digital, and resilience competences.

EPD-Net Learning Platform is ready! Enroll and Check out the Moodle

Access via QRs to the EPD-Net Learning Platform

A new digital learning environment designed to support education and capacity building in ecological planning, disaster management, sustainability, and resilient urban development. We invite you to explore the platform, enroll in courses, and join our growing learning community.

Supplementary public decision-support GPT for nature-based analysis.

Developed within the Erasmus+ EPD-Net project, the platform offers a wide range of online courses accessible in six languages, enabling learners from diverse backgrounds to gain knowledge and practical skills in key areas related to disaster-resilient and sustainable cities. Participants can learn at their own pace, access high-quality educational materials, and earn certificates upon successful completion of courses.
